

**Exercise just
got more fun...**

 **PLAYWORLD**
The world needs play.

Now it's easy to get excited about exercise...

NEOS® 360 draws a crowd and engages people of ages and abilities with its modern design, blinking lights and sounds.

A series of five wavy, horizontal lines in shades of orange and yellow, flowing from the left side of the page towards the right, positioned below the main text.

NEOS® 360 Original

Embracing technology in ways that help burn calories and increase heart rates is a winning combination to aid fitness goals and combat growing obesity issues.

A NEOS® 360 workout is comparable to jogging or playing football and raises heart rates by an average of 20%*.

*Energy Expenditure at Play, Geisinger Center for Health Research and Playworld Systems, 2008.

No heavy weights or confinement to a gym.

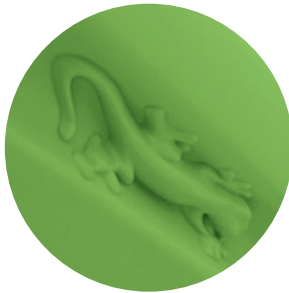

Built to last.

Park-tough, weatherproof, vandal-resistant and designed to endure every challenge of outdoor life.

PVC-Free Eco-Armor®

Durable, thermoplastic coating for extra protection on high traffic areas is FREE from all harmful phthalates, lead, cadmium and dioxins.

Superior Rotomolded Plastic

Compounded resins offer reliable color consistency and UV stability, and are graffiti-resistant. Provides 34% elongation/stretching properties and greater impact-resistance, which creates a superior product (as compared to dry-blended resins).

Exceptional HDPE Plastic

Color-matched to our rotomolded plastics and powder coating for aesthetic appeal, and graffiti-resistant for easy cleaning.

Easy-to-Install Clamps

Die cast aluminum clamps for precision fit and 360° compression, and 10 times stronger than required.

Tamper-Resistant Stainless Steel Hardware

Backed by a lifetime warranty, all Playworld® hardware is stainless steel to prevent rust and corrosion. Most require only a TORX® head driver for hassle-free assembly. Exposed hardware is also tamper-resistant for added security.

Triple-Coated Tubing

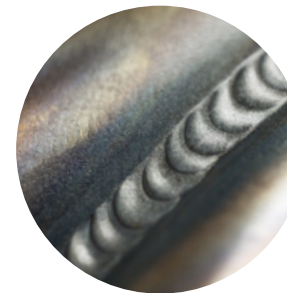

3 coatings are applied to high strength, cold-formed steel tubing:

- 1) A hot-dipped zinc layer inside and out.
- 2) A chromate conversion coating to prevent oxidation.
- 3) A clear polymer coating for application of powder coating.

BLM Laser Tube Cutter

To create the highest quality products, we embrace new ideas and technology. Our laser tube cutter means more accurate part production in less time for more precise fit and high quality welds.

Weldments

Non-flattened, coped weld joints are stronger since more of the tubing surface is in direct contact at the weld joint. Manual welding ensures quality and better appearance.

Rust Defender Process

Triple-coated steel tubing is just the beginning. Tumbling flat sheet plates rounds edges for a smooth, clean surface. Epoxy/polyester primer on welds and flat plates deters corrosion. Rust-resistant, durable aluminum post caps seal the tubes.

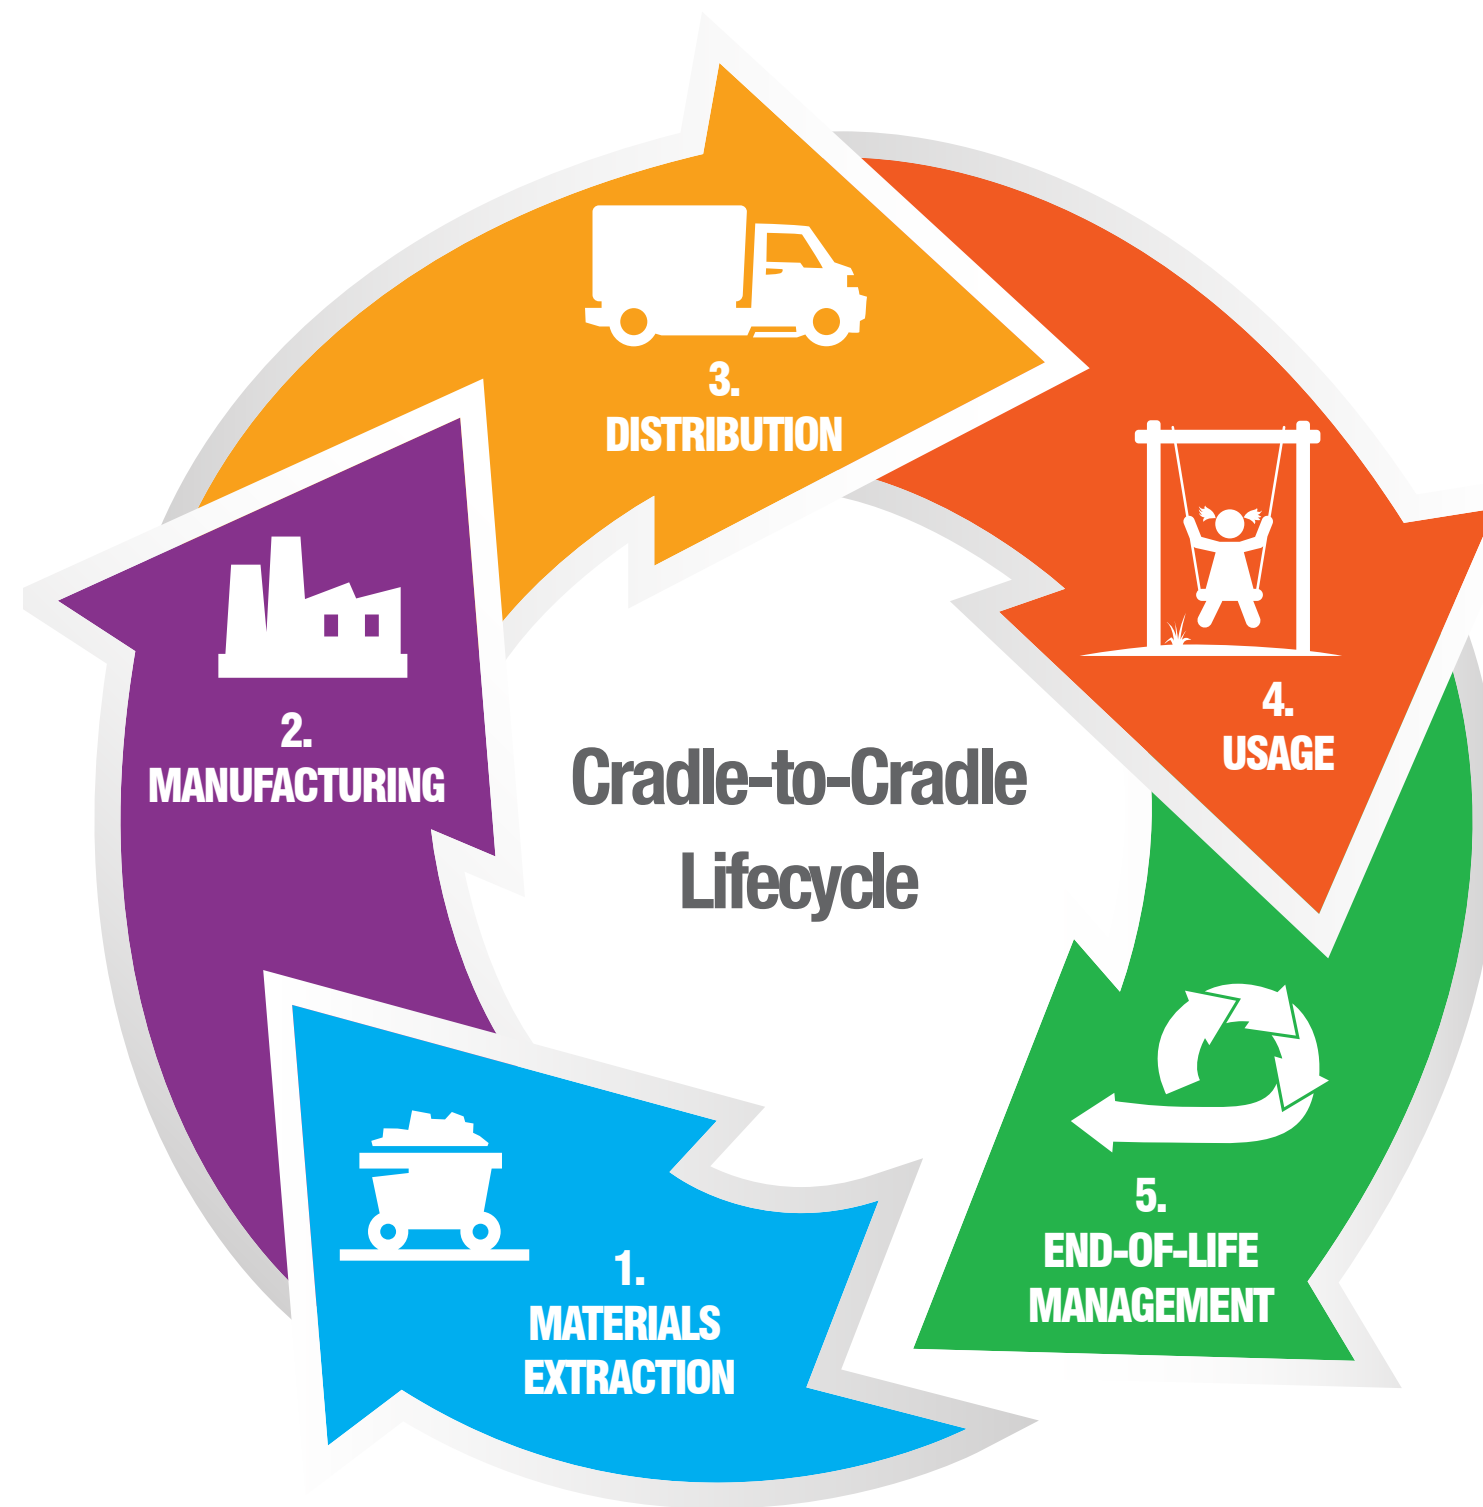

Super Durable Polyester Powder Coating

Complete with Rust Defender for remarkable protection on all weld joints and brackets. Superior UV stability and color fade resistance with 80% gloss retention over 6 years (compared to standard paint, which maintains only 20% gloss retention in 2 years).

Playworld is **the only commercial playground manufacturer** with Cradle to Cradle Certified^{CM} Silver equipment and our commitment to sustainability is built into every piece of playground equipment we make.

Visit [c2cCertified.org](https://c2ccertified.org) to learn more.

Additionally, NEOS[®] 360 is energy-efficient. Rest Mode conserves energy when not in use until “awakened” by touching a button.

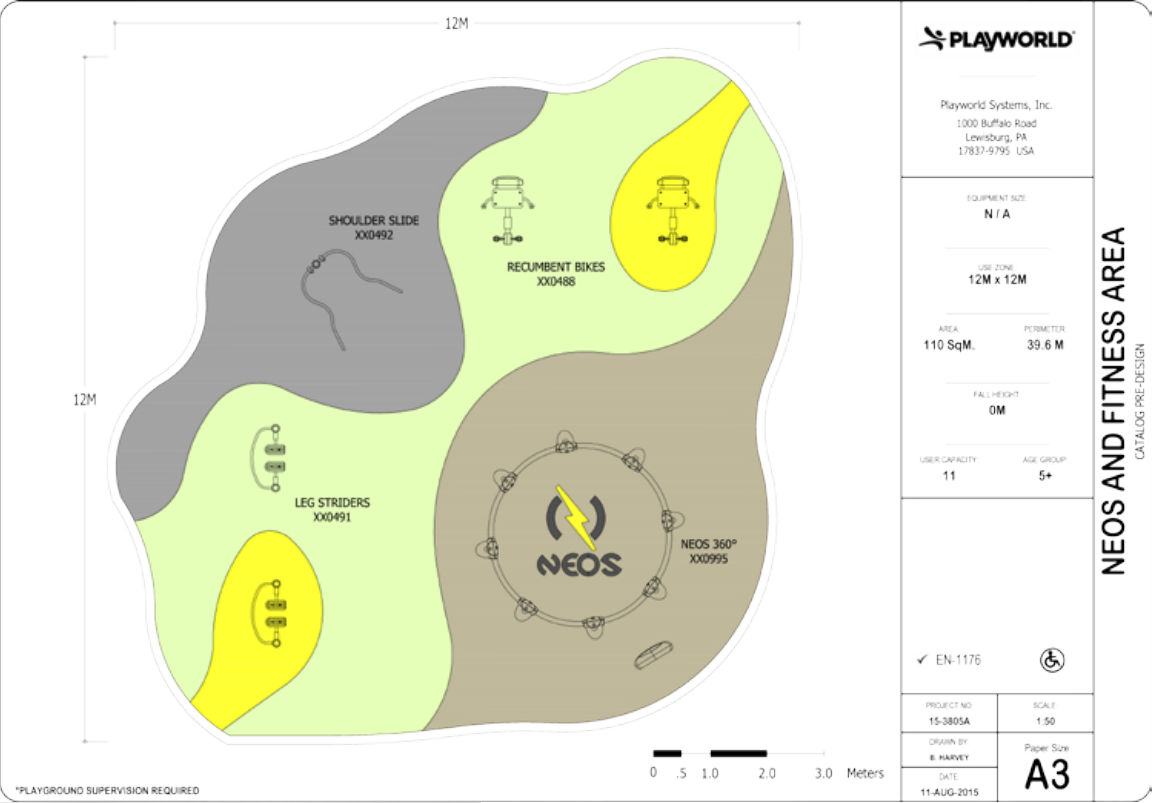

Flexible options

Available in either our traditional or accessible model with lower buttons for easy access. Customize your NEOS® with color to stand out or blend into the environment, or show community pride.

NEOS® 360 ACCESSIBLE

Neos and Fitness Area

Chatham, Kent ME4 4TR

Equipment Manufacturer

15-3805A

NEOS® can easily fit into any design with ease,
and can be used indoors or outdoors.

Fitness for Everyone

Strategic targeted exercises use functional fitness and body weight resistance to develop strength, flexibility, and balance. These specially developed fitness systems help people of all ages become active, strong, and vital.

Stretching

Multi-generational

Shoulder Slider

Arm & Shoulder Circles

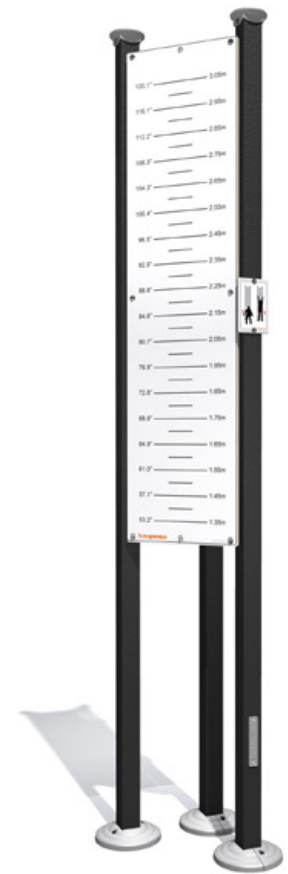

Recumbent Bike

The Strider

The Twister

Jumping Stretch

Stretching

Stretching fitness equipment focuses on areas of the body that house stress. Limited range of motion exercises work out the stress without overworking your muscles. Stretching increases circulation and flexibility, reduces stress and even enhances coordination and posture.

Multi-generational

Beginner through advanced level exercises and levels of intensity lets everyone work at their own pace and progress as their fitness improves. Proven to increase upper body and ab strength, sprint speed and flexibility.

SQUAT, DIP, PUSH-UP & BALANCE EXERCISES

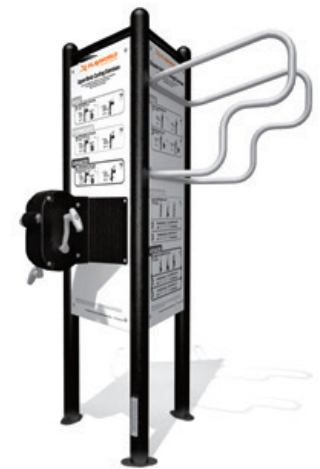

STATIC & DYNAMIC STRETCHES

CYCLING EXERCISES

- Welcome Panel
- Lower-Body Cycling Exercises
- ADA Upper-Body Cycling Exercises

SHOULDER STRENGTHENING EXERCISES

- Upper-Body Cycling Exercises
- Shoulder Stability & Strength Exercises
- ADA Shoulder Stability & Strength Exercises

CORE, TORSO & BALANCE DISC EXERCISES

PULLING, BACK, ANGLE BAR & HURDLE EXERCISES

UPPER & LOWER BODY STRENGTH EXERCISES

- Overhead Press Exercises
- Push-Up Exercises
- Squat Exercises

CORE EXERCISES

- Standing Stretches & Yoga Poses
- Weighted Squat Exercises
- Wobble Board Exercises

We can make it happen. **Let's get healthy.**
