benches for life

# SEDAN

stylish – elegant – inviting

*Left Ulrich Träger (Managing Director NUSSEER-GROUP) - right Alexander Beyer (Proxy NUSSEER-GROUP)*

# SEDAN

Supplemented by a lounge module, the SEDAN series is now complete. Whether as a single or double bench, almost endless benches or as lounge furniture. SEDAN stands for design-oriented streetfurniture at the highest level.

FSC® certified hardwood (SCS-COC-001802) untreated. Optional glazed colour brown. Steel parts are hot-dip galvanized and powder coated. Standard colour dark metallic grey (like DB 703).

# CONNECT

straight – modular – functional

# CONNECT

Contemporary design in combination with a modular construction. Create attractive places with the seven elements of the new **CONNECT** series.

FSC® certified hardwood (SCS-COC-001802) untreated. Optional glaze colour brown. Steel parts are hot-dip galvanized and powder coated. Standard colour dark metallic grey (like DB 703).

Product samples shown in special colours CHAMPAGNE and INDUSTRIAL GREEN.

# SATURN

Inspired by the characteristic shape of the planet, SATURN is a timeless modern round bench for tree integration.

Standard outer diameters two, three and four metres.

Complemented by the new straight extension modules (with or without backrest) different configurations and shapes are possible.

FSC® certified hardwood (SCS-COC-001802) untreated. Optional glazed colour brown.

Steel parts are hot-dip galvanized. Optional powder coated. Standard colour dark metallic grey (like DB 703).

# REGAS

developed for the Remstal Garden Show

Concrete, steel and wood in a purist restrained design. At the same time exceptionally comfortable because of the high backrest.

FSC® certified hardwood (SCS-COC-001802) untreated. Optional glazed colour brown. Concrete bases made of exposed concrete, chamfered on all sides. Steel parts are hot-dip galvanized and powder coated. Standard colour dark metallic grey (like DB 703).

# SILENCIO

developed for the Remstal Garden Show

Elegant design lounge with high backrest and extended leg rest. Optional also with rotating base for perfect positioning. Available also for two persons (on request).

FSC® certified hardwood (SCS-COC-001802) untreated. Optional glazed colour brown. Steel parts are hot-dip galvanized and powder coated. Standard colour dark metallic grey (like DB 703).

# CITY *line*

## A18 series – new feature and design options

Round waste container with sloping roof.

Available with vertical wooden slats

or in contemporary full metal design.

With optional ashtray integrated in the roof and/or integrated dispenser for dog waste bags.

Volume approx. 60 l.

FSC® certified hardwood (SCS-COC-001802)

untreated. Optional glazed colour brown.

Galvanized sheet metal and powder coated.

Standard colour dark metallic grey

(like DB 703).

Product samples shown in special colours DARK

RUSTY BROWN and INDUSTRIAL GREEN

Inner-bin made from galvanized sheet steel.

# CITY *rund*

## A7 series – new features and design options

Round waste containers with different roof shapes and volumes (60, 90 and 120 l). With optional ashtray integrated in the roof. Here with cool side panels made of expanded metal.

Container made of sheet metal and expanded metal. Galvanized and with powder coating. Standard colour dark metallic grey (like DB 703).

Product samples shown in special colours BRIGHT GREY and CHAMPAGNE.

A7 series door panels now also with integrated dispenser for dog waste bags.

Another new feature is the compensating base for perpendicular installation on inclined surfaces.

# PROFI *rund*

## A3 – the new litter bin series

Round litter bin A3-S45 with front insertion on U-profile support. Also as a combination with ashtray AB3-S45. The highlight here is the quick and easy emptying of the ashtray downwards. Volume approx. 45 l.

Container made of sheet metal hot dip galvanized. Optional with powder coating. Standard colour dark metallic grey (like DB 703).

# ZWILLING *top*

AB1/4 and AB14/3 series – new features and design options

Round (AB1/4) and square (AB14/3) litter bin combinations with ashtray on U-profile support with new ashtray plate made of 3 mm stainless steel. Volume approx. 35 l. Also available with larger volumes up to 65 l.

Container made of sheet metal hot dip galvanized. Optional with powder coating. Standard colour dark metallic grey (like DB 703).

Product sample shown in special colour BERRY.

# PROFI *yps*

A11 series – new features

The oval litter bin on U-profile support now comes as standard with galvanized inner-bin made from mesh wire. Volume approx. 50 l.

Container made of sheet metal hot dip galvanized. Optional with powder coating. Standard colour dark metallic grey (like DB 703).

Product sample shown in special colour BRIGHT GREY.

# JOJO

## bikeparker

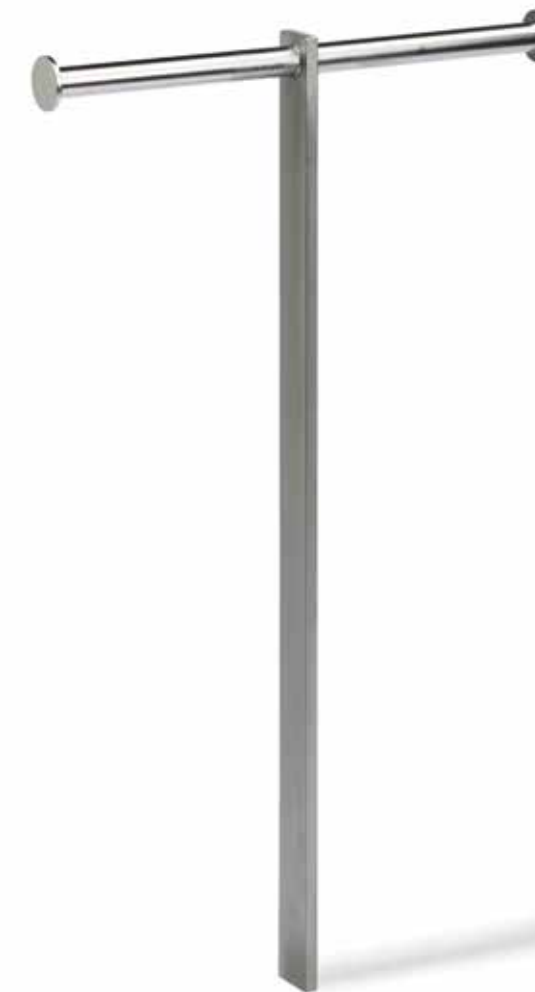

Effective, beautifully shaped bicycle rack made of stainless steel. Due to the variable saddle suspension, two bicycles can be parked safe and secure. Width approx. 150 cm.

Made of V2A stainless steel, blasted and dull electropolished.

# ACTIVA

## bikeparker

Design bicycle rack made of stainless steel for saddle suspension of almost all model types. Two bicycles can be parked safely and flexibly. Width approx. 63 cm.

Made of V2A stainless steel, blasted and dull electropolished.

# benches for life

We are an independent company under the umbrella of the NUSSER GROUP. We have been developing and producing furniture for public outdoor spaces for almost 90 years. Quality and functionality, but above all architectural demands, determine the orientation of our product range.

Traditional craftsmanship was passed down to us by the company founder Wilhelm Nusser. We have maintained this standard for the processing of natural and technical materials to this day. Even if today, in addition to handcrafted processes, we also use a wide range of innovative and resource-saving production technologies. It is the work of our experienced craftsmen that distinguishes a NUSSER product. Particularly in the case of seating furniture, production therefore generally takes place on an order-by-order basis and not in automated series production. We therefore see ourselves as an industrial manufactory and not as an industrial mass-production company. Over the decades, we have established ourselves as a reliable partner for public and non-public clients and architects.

Our products are manufactured exclusively in our own production facilities with our own employees. This enables us to reliably guarantee the highest quality, but also a high degree of flexibility. Because not every city and every place are similar - fortunately!

We are a FSC® certified company since 2009 and only process wood from sustainably managed regions. Our certificate number is SCS-COC-001802.

This brochure was printed on FSC® certified paper.

In addition to design and functionality, the colour-design of street furniture is becoming more and more important. In this brochure, we therefore present our product innovations not only in the standard colour DB 703, but also in our new special colours. These are available for our entire product range.

Our complete product range as well as further information on the materials used, can be found on our website. We are also happy to be there for you personally. If you have questions or would like a consultation, simply send us an e-mail or give us a call.
